The unique format using both photographs and illustrations makes Pamela Moore's book Wyoming Birds for Kids fun and educational. The beauty and colors of the illustrations draw children in, and the photos and information are perfect for beginning bird watchers, or kids simply interested in Wyoming wildlife. Moore has an innate knack for presenting information, such as the fact that an individual American Robin can eat up to 14 feet of earthworms a day! Having a bird book specific to our region makes it my go-to book for any child asking about bird identification guides. It's a must-have title for our collection.
